3D PRINTING SOLUTIONS TO MAXIMIZE  
DENTAL LAB PRODUCTIVITY

THE 3D PRINTING SOLUTIONS COMPANY

---

Stratasys 3D printing dental solutions give your lab the tools for increased productivity and efficiencies through a complete digital workflow, providing new production capacity and the option to expand your business.

The cornerstone of Stratasys dental solutions is PolyJet™ technology, the only 3D printing platform producing multiple colors and materials in a single print. No other digital dental solution offers the combination of high resolution, accuracy and versatility that PolyJet technology provides.

THE 3D PRINTING SOLUTIONS COMPANY

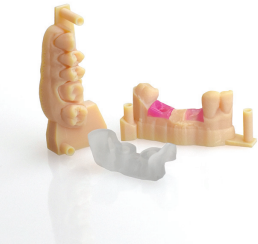

## RESTORATIVE SOLUTIONS

Stratasys restorative dental solutions give labs the ability to increase capacity with the existing workforce, offering faster turnaround times for clients while creating new revenue streams. PolyJet high-resolution photopolymers produce highly accurate models in a fraction of the time it takes to create traditional stone models, eliminating human error, for precise crown and bridge models.

## ORTHODONTIC SOLUTIONS

Stratasys orthodontic solutions offer a cleaner process and an improved case presentation while eliminating physical model storage, freeing office space. PolyJet photopolymers supply the precision for highly accurate orthodontic models and appliances with predictable and repeatable results, providing increased model consistency and decreased labor.

## IMPLANTOLOGY SOLUTIONS

Stratasys technology simplifies the complexity of implantology while achieving greater accuracy, providing soft-tissue models without the need for impression copings, all with minimal labor. Biocompatible MED610 material in combination with PolyJet ultra-fine printing resolution produces surgical guides with high precision, capable of intra-oral contact.

## REMOVABLE SOLUTIONS

Reduce patient visits and resets with more precise frameworks and denture try-ins, produced in less time. Stratasys PolyJet technology produces smooth, ultra-fine surfaces needed to create the perfect fit for denture try-ins and partials, critical for patient satisfaction and reduced rework.

Stratasys 3D printers lie at the heart of our dental solutions. From compact yet robust printers that boost productivity to large-capacity, multi-material systems for complete digital dentistry needs, Stratasys dental 3D printers increase capacity and fuel growth.

Stratasys is shaping dentistry. We're trusted worldwide and have been at the forefront of 3D printing innovation for more than 25 years. Every need is different, and regardless of what your next case calls for, Stratasys has the complete solution to achieve your needs.
